

YEAR 6

Literacy

This term we will link parts of our Literacy to the aspects of Britain since the 1950s topic. The children will be writing a variety of different things and developing their skills in editing and redrafting their work.

Numeracy

In Numeracy this term, we will be revisiting topics which have previously been covered in order to prepare the children for their transition to High School. We will also be carrying out some creative topics in the outdoor environment.

French

The children will be mainly consolidating things learnt so far at Eagley in preparation for high school. We will focus on key words, phrases and verbs. They will continue to communicate with French pen pals to show them what we wear at school and what our homes look like.

Topic

We will be concluding our work on the history of Britain since the 1950s. On 22nd June, we have invited grandparents to join us in order to share their experiences of childhood with the children. Thank you to those who have kindly agreed to come in to help, and if there are any other willing volunteers, please to get in contact with Miss Dawber or Mr Latham. Another date for your diary is July 13th, when family members are invited to come in to view the family museums from 2:30pm.

Science

We will be learning about electricity this term, using proper symbols to create circuit diagrams. We will be using our knowledge to construct an electronic game.

RE

This term we will be researching and discussing inspirational muslims.

Art/Design Technology

This term the children will be constructing dens, as well as using a variety of woodworking tools and skills to cut, shape and refine wooden mallets or rounders bats. We will also be using clay to create model monsters.

PE

This term the children will be learning about the rules of, and practising the skills required in rounders. It is essential to have PE kits in school, as well as outdoor trainers, at all times as we make use of the nicer weather to get outside and work on these skills whenever possible!

Computing

In computing this term, we will be learning how to create and modify spreadsheets. We will be learning about formulae and how these can help us to be accurate and save time when completing a variety of tasks.

Music

The children will be learning how to write a song.
